[linkedin.com/in/ayush-murali-m-7b5b6527a](https://www.linkedin.com/in/ayush-murali-m-7b5b6527a)

PROFESSIONAL SUMMARY

Motivated Computer Science Engineering fresher from Coorg Institute of Technology with hands-on full-stack development experience through a professional internship. Proficient in Python, Linux/Unix environments, and networking fundamentals, with practical exposure to RESTful API design, deep learning, and IoT-based systems. Strong analytical and communication skills with a proven ability to self-start and thrive in fast-paced, collaborative teams. Fluent in English (verbal and written).

TECHNICAL SKILLS

- Programming Languages: Python (primary), JavaScript, SQL; familiar with C-style syntax and Go fundamentals
- Data Structures & Algorithms: Applied in project development and academic coursework
- Linux / Unix: Command-line proficiency, shell scripting, file system management, process handling
- Networking Fundamentals: TCP/IP concepts, HTTP/HTTPS protocols, RESTful API design, client-server architecture
- Software Development Lifecycle: Version control (Git), agile sprints, code reviews, collaborative debugging
- Databases: MongoDB, MySQL, SQL — relational and non-relational database management
- Frontend: React.js, HTML, CSS, JavaScript
- Backend: Node.js, Express.js, RESTful APIs
- Tools & Hardware: Git, Microsoft Excel/Word, Arduino, Embedded Systems, RFID Modules

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern

Feb 2026 – May 2026

Prinston Smart Engineer, Bangalore

- Developed and maintained full-stack web application features using React.js, Node.js, and MongoDB.
- Designed and implemented RESTful APIs, applying HTTP/HTTPS protocols and client-server communication principles in a Linux-based environment.
- Built front-end components and integrated them with backend services and database layers.
- Participated in code reviews, agile sprint demos, and collaborative debugging, applying Git and SDLC best practices across a 3-month engagement.

PROJECTS

Unusual Activity Identifier Using Deep Learning [Major Project]

Tech: Python, Vision Transformers, Deep Learning, IoT | 2025 – 2026

- Designed and implemented a real-time surveillance system using Python and Vision Transformers to detect anomalies (fights, accidents, sudden movements) in video streams.
- Optimized the model via pruning and quantization for embedded/IoT deployment; integrated multi-channel alerts (SMS, email, IoT siren) on anomaly detection.
- Managed the full project lifecycle independently: requirements analysis, architecture design, implementation, and testing.

Live Stock Management Using Arduino [Mini Project]

Tech: Arduino, RFID, Embedded Systems, Sensors | 2024 – 2025

- Designed an RFID-based Arduino device to monitor and record livestock attendance in real time.
- Implemented sensor data logging and automated tracking logic to assist farm management.

CERTIFICATIONS

- Machine Learning Implementation
- Cloud Computing
- Data Visualization Using Power BI
- Computer Graphics: Advanced Moving Car Graphic

EDUCATION

B.E. in Computer Science and Engineering | Coorg Institute of Technology, VTU
PUC – PCMB (XII) — 86% | Sarvadeivatha PU College
SSLC – KSEEB (X) — 88.32% | Sarvadeivatha English Medium School, Aruvathoklu

PERSONAL QUALITIES

Fluent in English (Verbal & Written) | Strong Analytical & Problem-Solving Skills | Multi-tasking | Self-Starter | Team Collaboration | Time Management
