## PROFESSIONAL SUMMARY

Motivated Computer Science Engineering fresher from Coorg Institute of Technology with hands-on full-stack development experience through a professional industry internship. Proficient in Python, Linux/Unix environments, and networking fundamentals, with practical exposure to RESTful API design, deep learning, and IoT-based systems. A proactive self-starter with proven problem-solving abilities and collaborative team communication skills.

## TECHNICAL SKILLS

**Languages:** Python (primary), JavaScript, SQL, C syntax, Go

**Backend & APIs:** Node.js, Express.js, RESTful API Design

**Systems & Network:** Linux/Unix, Shell Scripting, TCP/IP, HTTP/S

**Frontend:** React.js, HTML5, CSS3, Responsive Web Design

**Databases:** MongoDB, MySQL (Relational & Non-Relational)

**Tools & Hardware:** Git, GitHub, Arduino, Embedded Systems, RFID Modules

## INTERNSHIP EXPERIENCE

### Full Stack Web Development Intern | **Prinston Smart Engineer, Bangalore**

Feb 2026 – May 2026

- Architected and deployed a full-stack e-commerce Burger Shop web application utilizing React.js, Node.js, Express, and MongoDB.
- Engineered dynamic product menus, customized burger builder workflows, interactive cart states, and simulated checkout pipelines.
- Designed and documented robust RESTful APIs adhering to HTTP/HTTPS and client-server protocols on Linux environments.
- Participated actively in Agile sprint routines, peer code reviews, and Git-based version control workflows.

## KEY PROJECTS

### Unusual Activity Identifier Using Deep Learning [Major Project]

2025 – 2026

*Tech Stack: Python, Vision Transformers, Deep Learning, IoT Siren, Multi-Channel Alerts*

- Architected a real-time surveillance anomaly detection pipeline to identify fights, accidents, and unusual movement.
- Optimized model efficiency via weight pruning and quantization for deployment on embedded and edge hardware.
- Configured automated notification hooks (SMS, email, IoT sirens) and directed testing across the project lifecycle.

### Livestock Management Using Arduino [Mini Project]

2024 – 2025

*Tech Stack: Arduino, RFID Modules, Embedded C, Hardware Sensors*

- Built an automated RFID tracking unit that logs and manages livestock attendance and metrics in real time.
- Programmed sensor data acquisition scripts to streamline farm management and inventory visibility.

## CERTIFICATIONS

- Machine Learning Implementation
- Cloud Computing Fundamentals
- Data Visualization Using Power BI
- Computer Graphics: Advanced Moving Car Graphic

## EDUCATION

**2026** B.E. in Computer Science and Engineering

Coorg Institute of Technology, VTU

**2022** PUC – PCMB (Class XII) • **86%**

Sarvadeivatha PU College

**2020** SSLC – KSEEB (Class X) • **88.32%**

Sarvadeivatha English Medium School
